LANSTAB-ZAA

Zinc Acetyl Acetonate

CAS No. 14024-63-6

Specifications:

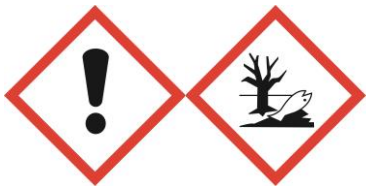

Tests	Specification
Appearance	White crystalline powder
Zinc	23~26%
Moisture	6.0~8.0%

Package: 25Kg/Bag

Application:

- As an additive, this product is the most commonly used heat stabilizer in PVC materials. It can also be used as catalyzer, resin crosslinker, resin hardening accelerator, rubber additive and the forming agent of hyperconductive film, hot wire reflective glass film, transparent conductive film. It is an environmental product instead of lead containing auxiliary.

Storage: Keep away from open flames, hot surfaces and sources of ignition. Keep container tightly closed.

Recommend Shelf Life: 12 months.
